

Safety Data Sheets & Hazmat Consulting Program Information

Up-to-date, Comprehensive Chemical Management Program:

Never again worry that your onsite chemical information is out of date. This service provides current Materials Safety Data Sheet (MSDS) information on any chemical you or your employees handle or transport.

Onsite and Emergency Information:

Ensure your employees are fully informed about the chemicals to which they're exposed and have emergency information at their fingertips using the wallet cards, stickers and posters that will be provided for your offices;

Spill or Exposure Hotline:

Get instant access to a *live person*—an accredited Physician or Toxicologist—available 24/7, who can provide expert medical advice. Also, in the event of a spill or exposure, crucial chemical information will be quickly forwarded (at no additional cost) to the hospital or emergency room of your choice.

Chemical Disposal/Cleanup:

Get authoritative information on how to dispose of or clean up hazardous materials—to avoid accidents or environmental harm/fines. This service also serves as your **Federal Requirement Fulfillment**: It satisfies the rules and regulations that require access to current HAZMAT information, under OSHA's "right to know" program. The Hazardous Materials Management and Hotline Service is provided by 3E Company, a trusted global provider of chemical, regulatory, and compliance information services.
